# System Operation POLICY

October 2, 2014

## Object

Establish the principles and guidelines on matters regarding the operation of electrical power systems, for the safe, effective, transparent, impartial and sustainable management of the operation of electricity systems. These principles and guidelines shall lead to the fulfilment of the strategies and objectives of the Red Eléctrica Group.

## Scope of application

Red Eléctrica Group.

## Basic principles and guidelines

- Apply the principles of excellence adopted by the Red Eléctrica Group and incorporate and promote best practices regarding the operation of electricity systems.
- Ensure the continuity and security of the electrical power supply.
- Maintain at all times the safety and quality requirements needed for electrical power supply and the health and safety of those affected by the operation of the system.
- Ensure proper coordination between power generation and electricity transmission.
- Ensure transparency in decision-making and in the information provided to agents and institutions.
- Ensure that the decisions made by the System Operator, are reached with objectivity, fairness and independence.
- Guarantee the confidentiality of data and information as required by legal and internal regulations.
- Strengthen dialogue and the exchange of information with agents operating in the electricity system and with the institutions, in order to facilitate the proper execution of the functions assigned to each.
- Ensure that proposals for future development of the grid contribute to ensuring security of supply, fulfilling criteria of safety, quality, efficiency and sustainability.
- Programme demand coverage ensuring security of supply and incorporating cost minimization criterion.

This **System Operation Policy** was approved by the Management Committee on October 2, 2014.
