(*) The financial statements for the first half of 2011 include the assets acquired from Endesa Distribución, S.L., Unión Fenosa Distribución, S.A.U. and Hidrocantábrico Distribución Eléctrica, S.A.U.

2. Earnings performance

The **Group reported Revenue** of €806.8 million in the first half of 2011, up 24.1% thanks to a larger contribution from transmission business. 62% of the increase was accounted for by the assets acquired during the latter half of 2010, and the remainder by the contribution of assets commissioned in the previous year.

EBITDA totalled €608.3 million, up 28.8% on the previous year. This improvement was driven by higher revenue and:

- The 6.2% rise in the **Cost of supplies and other operating expenses** with respect to the previous year.
- **Personnel expenses** increased by 21.4% and include €8.9 million in extraordinary expenses for severance payments made in 2011. Stripping out the extraordinary effects in both years, growth in this item would be 10.1%, mainly due to the increase in the size of the average workforce and CPI trends.

The **average workforce** at the Red Eléctrica Group at 30 June 2011 was 1,767 employees, an increase of 4.6% with respect to the same period in 2010. The **total number of employees** was 1,772, 0.5% higher than at December 2010.

Operating expenses

(in thousands of euros)	January - June			April - June		
	2011	2010	Δ %	2011	2010	Δ %
Supply cost and other operating expenses*	139,959	131,753	6.2	77,886	72,216	7.9
Staff costs	68,072	56,088	21.4	30,497	27,234	12.0
Operating expenses	208,031	187,841	10.7	108,383	99,450	9.0

Depreciation and amortisation charges for the period rose by 37.0% compared to the first half of 2010, mainly due to the larger transmission asset base following acquisitions and other assets brought into operation.

EBIT increased by 25.2% with respect to the same period in 2010.

Financial results showed an overall expense of -€70 million compared to -€66.4 million posted in the first half of 2010. Financial revenues stood at €XX million, and include the €4.5 million dividend distributed by Redes Energéticas Nacionais, SGPS (REN). Financial expense totalled €73.1 million, compared to €42.8 million in the first half of 2010. An increase in the average cost of financial debt caused by acquisition of transmission assets was the main reason for the greater outlay. Red Eléctrica also recognised an impairment provision of €2.7 million during the first half of 2011 on its stake in REN.

The effective tax rate was 36.0%, compared to 29.2% in the first half of 2010. The non-recurring rate increase was mainly due to the more conservative appraisal with respect to recovery of the prepaid tax generated by impairment of the Group's international holdings.

Finally, **Profit for the period** increased by 17.4% year-on-year.

3. Cash flow and balance sheet performance

(*) The difference emerging from the change in Net financial debt on page 2 corresponds to items causing no movements in the cash position.

Operating cash flow after taxes and changes in working capital have enabled the company to finance its investments over the period, pay out a dividend and reduce financial debt by €109.6 million .

Investments carried out by the Group in the first half of 2011 totalled €351.8 million, an increase of 8.0% on those carried out during the same period in 2010. A large part of the investment made during the period was earmarked for the national transmission grid (€345.1 million)..

Dividends paid at 30 June 2011 totalled €79.2 million, an increase of 14.7% on the interim dividend paid out during the same period in 2010.

The Red Eléctrica Group **had Net financial debt** of €4,642.2 million at 30 June 2011, down 2.4% compared to year-end 2010.

81% of the Group's net debt is fixed rate, whereas the remaining 19% is floating rate.

The average cost of the Group's financial debt during the first half of 2011 was 3.59%, with an average balance of €4,749.8 million. In the same period in 2010, the average cost of debt was 3.29%, and the average balance €3,266.7 million.

At 30 June 2011, the Red Eléctrica Group's **Equity** stood at €1,702.4 million, representing a 4.8% increase with respect to the 2010 year end. The increase was mainly due to the earnings obtained during the first six months of the year, the reduction in treasury shares and an increase in the valuation of hedging operations, partially offset by the accounting of the distribution of profits for the year approved at the General Shareholders' Meeting in April 2011.

4. Relevant events during the first half of the year

- **General Shareholders' Meeting:** The General Shareholders' Meeting held on 13 April approved the Annual Financial Statements of Red Eléctrica, its management by the Board of Directors, and the distribution of a dividend of €1.8751 per share, equivalent to the distribution of 65% of EPS.
- **Payment of dividends:** A dividend of €1.2869 per share was paid on 1 July as a gross final additional against 2010 earnings.
- **New line of credit:** On 14 July Red Eléctrica took out a new 5-year €600 million credit facility to strengthen the Group's sound liquidity position and cover the refinancing of its current syndicated loan falling due in July 2012.
