### Installed power capacity

- **Peninsular electricity demand**: 249.4 TWh (2019), 2018: 239.0 TWh (-1.6%)
  - Adjusted the working days and temperature: -2.7%
- **National electricity demand**: 264.8 TWh (2019), 2018: 256.0 TWh (-1.5%)
  - Adjusted the working days and temperature: -2.5%

### Non-peninsular electricity demand

- **Renewable electricity generation**: 15.4 TWh (2019), 2018: 14.5 TWh (+4.3%)
  - Compared to 2018
  - Baleares Islands: +1.6%
  - Canary Islands: +0.2%
  - Ceuta: -0.2%
  - Melilla: -0.8%

### Generation structure: National electricity system

- **Total generation**: 261.02 TWh (2019), 2018: 259.98 TWh
- **Renewable electricity generation**: 96.3 TWh (2019), 2018: 89.3 TWh
  - 38.5% of the total generation
- **Generation structure without CO2 National system**: 58.6% (2019), 2018: 59.7%

### International exchanges

- **Exports**: 12.2 TWh (2019), 2018: 18.8 TWh
  - Adjusted the working days and temperature: -2.5%
- **Imports**: 11.1 TWh (2019), 2018: 18.8 TWh

### Transmission grid in Spain

- **Length of circuit**: 44,457 km
- **Dark fibre installed in the transmission grid of REE**: 33,700 km
